NEW 2019

Juun

Natural light close at hand!

Thanks to the practical solutions of the new **Juun aluminum blind** from Anwis, you can decide which part of the window will be covered. You can move the shutter up or down and rotate the horizontal lamellas with one hand movement, letting in exactly as much light as you want!

Colour and security

The availability of nearly 100 colours of lamellas and 8 colors of control equipment makes it easier to fit the **Juun** blind into the interior.

The lack of cords to control makes the new **Juun** aluminum blind a child safe by design product.

Juun freedom in handling
the access of natural light

simple, non-invasive
assembly

the blind fitted
in the light of the glass
allows the window to be
opened to the full extent

very easy control
thanks to ergonomic
rubber grips

bidirectional blind control
using the upper and lower
control shaft

the rich colors of the blinds
give you unlimited freedom
in arranging any space
