1	2	3	4			5			6						7		8			9						10			11				12

Column headers: Fabric (col 4), FLEX curtain (cols 5–7), WAVE curtain (cols 8–9), RINGS curtain (cols 10–11)

Please note:
1. The lining option is available with selected fabrics (see price list: fabric collection).
2. In the "split-draw" option "the width" is the sum total of the two symmetrical curtains.
3. Max. width of the rail is 3,9 m (**Flex**), 6,0 (**Wave**), (longer rail will require a connector).
4. If products ordered are going to be placed in the same room, please mark the room number in column 12. This is necessary for aligning the level of seams.
5. If the width of an individual rail is not specified, the curtain will be fitted with a rail whose width is based on curtain width.
* In FLEX curtain the width of curtain is measured from the first to the last FLEX hook.
** In RINGS curtain the width of curtain equals the width of fabric already gathered and installed in the window.
*** If no colour is selected, the curtain will be supplied with headrail in white.
