| Item (extra charge)              | Unit | Price | Comments                           |
| Painting profiles – RAL colour   |      | 40%   | plastic components are not painted |
| Profile laminate                 |      | 30%   |                                    |
| Insect screen frame              | m    | 6,2   |                                    |

The price of **type 2** pleated screen is the sum total of the value of the two panels.

**Example:**  
type 2 pleated screen – 3800x2400:  
price: 485 x 2 = 970 EUR./net.

MOUNTING OPTIONS / MEASUREMENT

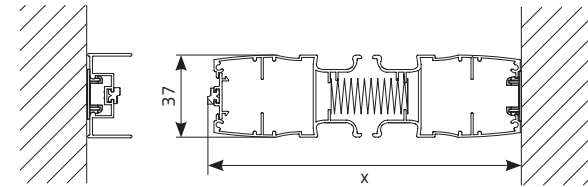

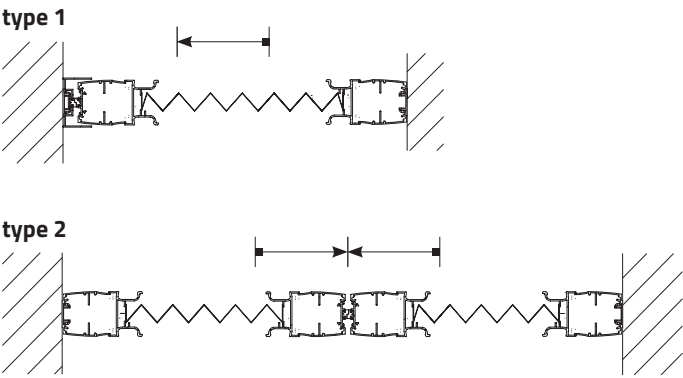

dimension as specified in order form (mm) = (width B) x (height H)

| MAXIMUM DIMENSIONS |                 |                  |
|--------------------|-----------------|------------------|
|                    | max. width (mm) | max. height (mm) |
| Type 1             | 2900            | 3500             |
| Type 2             | 5800            | 3500             |

| THE WIDTH OF THE PACKET      |                                                             |         |
|------------------------------|-------------------------------------------------------------|---------|
| The width of the screen (mm) | the width of packet with screen pulled to the side (mm) - x |         |
|                              | TYPE 1                                                      | TYPE 2  |
| 600 - 1900                   | 160                                                         |         |
| 1901 - 2900                  | 175                                                         |         |
| 2901 - 5800                  |                                                             | 175 x 2 |

TYPES OF PLEATED INSECT SCREENS

After the insect screen is closed, a 40 mm gap between profiles may occur (as a result of mesh springing back).
